Our Company
For over 43 years, Pharmacy Systems, Inc. (PSI) has been the leader in hospital pharmacy management and clinical consulting services throughout the Midwest. PSI was founded with the mission to provide high quality, cost-effective pharmacy management services that exceed client expectations. Our clients include acute care hospitals, health systems, hospital corporations, and specialty hospitals – orthopedic, surgical, long-term acute care and rehabilitation. PSI has consistently maintained the highest quality and most cost-effective pharmacy services available.

Why PSI
- Over 125 managed PSI sites ranging from critical access hospitals to multi-site health systems.
- Network with an extensive group of operation and clinical managers.
- Direct management of 1,600+ healthcare professionals.
- Providing multiple tools and resources to support our managers.
- 85% market share of outsourced hospital pharmacies in our region.
- 96% client retention rate: Longest served client - 28 years.

Residency Requirements/Application
Successful candidates will be graduates of an accredited pharmacy program and licensed to practice pharmacy in the state of Ohio within ninety (90) days of program initiation (September 30). Residency begins in June (date to be determined) and ends two (2) years later on June 30.

Application is a TWO STEP process with a deadline of January 6, 2017.
- All residency applications will be processed through PhORCAS.
- Resident must also submit an application to The Ohio State University Graduate School to apply for the MS in Health System Administration (http://pharmacy.osu.edu/future-students/ms-health-system-pharmacy-administration-combined-residency). Please contact Jay Mirtallo (mirtallo.1@osu.edu), Director, MS in Health-System Pharmacy for further questions on this process.

The majority of the didactic coursework is completed during the first year of the residency program. Residents will also be exposed to several clinical, ambulatory, quality, leadership, medication use evaluations, and management experiences. In their second year, residents will complete twelve (12) months of full-time required management and selected clinical and elective rotations. Residents will also be expected to complete a major research project under the supervision of preceptors from PSI and faculty members from the College of Pharmacy. This project will be presented at the ASHP Midyear Clinical Meeting (MCM) and the Great Lakes Pharmacy Residency Conference (GLPRC). Please contact Residency Program Director, Gretchen Lindsey (glinsey@pharmacysystems.com), for more information.
