Our Mission

The overall mission of the College of Pharmacy is to advance pharmaceutical care for the people of Ohio and the global community through our teaching, through our research, and through our service. The college will provide high quality education in the pharmaceutical sciences and pharmacy practice to professional, undergraduate, graduate, and postgraduate students through teaching, research, practice, and related service activities including outreach and engagement.

From the Dean

Robert W. Brueggemeier, PhD
Dean, College of Pharmacy
The Ohio State University
The OSU College of Pharmacy focuses on improving medications and medication-related health outcomes for the people of Ohio and the global community through our teaching, through our research, and through our service. Our educational programs - PharmD, BSPS, and graduate programs – are continuously improving with curriculum revisions and enhanced assessment activities. These programs have also grown significantly in the past decade, with an increase in total enrollment of 34%. Dramatic growth has been experienced with the graduate-professional PharmD program (Doctor of Pharmacy), a 30% increase in enrollment, and the BS in Pharmaceutical Sciences, a 75% increase in enrollment. In Summer 2012, The Ohio State University converted from the quarter system to the semester system. This change involved not only course conversions but also opportunities for curriculum enhancements, and our faculty and staff did an outstanding job throughout this quarter-to-semester conversion.

Research and scholarship are major activities in the College of Pharmacy. Faculty, students, and research staff are extensively involved in the exciting processes of drug discovery and development, pharmaceutical sciences, and translational clinical research. Two drug candidates discovered by OSU Pharmacy faculty and students are completing early cancer clinical trials, and another drug candidate is being examined in NIH pre-clinical programs. In addition to our strong extramural research funding, the College of Pharmacy portfolio of intellectual properties and technologies is comprised of more than 40 patents in the past 5 years.

The Ohio State College of Pharmacy is extensively involved in outreach and engagement activities throughout the “local to global” continuum. Across all of our programs, faculty, students, and staff are engaged in improving the lives for Ohioans and all people through our daily activities. Examples include innovative pharmacy partnerships from corporate partnerships to health clinics in Appalachia Ohio, numerous student service-learning activities, exciting Partner for Promotion experiences, and enhanced global pharmacy education and research. The Generation Rx Initiative began at The Ohio State University College of Pharmacy in 2007 as a faculty and student learning community studying medication safety and the increasing misuse and abuse of prescription drugs. The program has expanded nationally and internationally over the years, including creation of the Generation Rx Lab at COSI this past year. Also, the inaugural Generation Rx University Conference was held in August 2012 to enhance collegiate prescription drug abuse prevention and student recovery.

Faculty, staff and students at The Ohio State University College of Pharmacy have more opportunities than ever before to make a difference in our world. Join us in celebrating these achievements.

Sincerely,

In Summer 2012, The Ohio State University converted from the quarter system to the semester system. This change involved not only course conversions but also opportunities for curriculum enhancements, and our faculty and staff did an outstanding job throughout this quarter-to-semester conversion.
Bachelor of Science in Pharmaceutical Sciences (BSPS)

This four-year undergraduate degree program provides students with an introduction to the major areas of the pharmaceutical sciences as well as a general education. Graduates of the BSPS program will be prepared for graduate education, graduate professional education, or a health-related career.

Alex Klausing (pictured below) earned a 2nd place award at the Denman Undergraduate Research Forum for his research entitled “Antipsychotic Drug Impact on Dopaminergic Neurons”
Our undergraduates have many opportunities to participate in research. Martin Dalefield, a 2012 Bachelor of Science in Pharmaceutical Sciences (BSPS) graduate, received the 2011 National Institute for Neurological Diseases and Stroke (NINDS) Exceptional Summer Student Award for his research accomplishments.

Under the direction of R. Benjamin Free, PhD, and David R. Sibley, PhD, at the National Institutes of Health in Washington DC, Dalefield studied the formation of protein complexes involving dopaminergic receptors, important research related to disorders such as Parkinson’s, Alzheimer’s, addiction, and dementia.

The Early Admissions Pathway (EAP) provides advanced admission to the College of Pharmacy’s PharmD program for a select group of Honors freshmen entering Ohio State.

Fourteen students were admitted to the 11th class of the EAP program. In addition, six students were successfully matriculated into the PharmD program during the 2011-12 school year.

Doctor of Pharmacy Program

The Ohio State University College of Pharmacy Doctor of Pharmacy (PharmD) program is an entry-level program leading toward licensure as a practicing pharmacist. The program is four years in length with an average class size of 130. Ohio State’s program is consistently ranked in the top 10 programs in the nation. Students gain a strong foundation in pharmacy practice in a variety of settings, while having broad access to many research, service and professional organizations.

Bickel Story http://pharmacy.osu.edu/news/newsreleases/?story=bickel
SNPhA MTM http://pharmacy.osu.edu/news/newsreleases/?story=asianfestival
In 2012 PharmD Students collaborated with faculty at Ohio University Heritage College of Osteopathic Medicine to participate in a new ambulatory care rotation providing services to underserved patients in southeastern Ohio. The most novel of the various ambulatory care settings in this rotation is a mobile clinic which houses a nurse practitioner, nurse, pharmacist, and pharmacy student as well as patient exam rooms and supplies.

In between rotations Pharmacy students still managed to find time to study while providing 8,853 hours of community health services! Third-year pharmacy student, J.D. Bickel, received the Excellence in Public Health Pharmacy Practice Award from the U.S. Public Health Service for his tireless leadership in advancing medication safety through the Generation Rx Initiative.

The College’s chapter of Academy of Student Pharmacists (APhA-ASP) was publicly recognized by the University for helping Ohio State make the 2012 President’s Higher Education Community Service Honor Roll. APhA/ASP students also organized the College’s 15th Chili Cook-off which raised $6,878 to support the Columbus Free Clinic Pharmacy.

Our chapter of the Student National Pharmaceutical Association provided medication therapy management services at the 2012 Asian Festival.

Pharm D Enrollment Statistics

- Mean cumulative GPA was 3.54
- Mean composite PCAT score was 79th percentile
- 59% are female
- 62% are Ohio residents
- 43% completed pre-pharmacy studies at Ohio State
Graduate Degree Programs

The MS and PhD programs at the College of Pharmacy attract talented and motivated students from across the globe to learn everything from research skills and methodologies in pharmaceutical sciences to coordinating pharmaceutical care in organized health care settings. These individuals help carry out the college’s teaching, research and patient care missions. Students advance research projects, bringing sharp insight and intellect to difficult research problems.

2012 has proven to be a fruitful year for our Graduate programs. Ben Naman and John Woodard, graduate students at The Ohio State University College of Pharmacy, received pre-doctoral fellowships from the American Foundation for Pharmaceutical Education.

Naman is a student in the laboratory of Professor A. Douglas Kinghorn, PhD, and is currently researching projects related to treating leishmaniasis and isolating natural products for potential cancer chemotherapy.

Woodard is currently working on developing a modular route to analogues of silvestrol, a potent inhibitor of translation in cancer cells. He is a student in the laboratory of Professor Jim Fuchs, PhD.

Distribution of Graduate Students

- Medicinal Chemistry & Pharmacognosy: 28
- MS in Health-System Pharmacy: 18
- Pharmaceutics: 21
- Pharmacology: 10
- Translational Science: 10

**TOTAL**: 87
Ryan Pavlovicz, a senior graduate student at The Ohio State University College of Pharmacy, was awarded the 2012 Outstanding Graduate Student Award in the Ohio State University Biophysics program. He describes his research focus as applying the laws of physics through the use of computational tools to understand how drugs interact with their targets in the body.

Graduation

The Ohio State University College of Pharmacy graduated over 270 students during the 2011-12 academic year. Included were 124 undergraduate, 21 graduate, and 134 professional students.

The ceremony in June of 2012, the 400th at Ohio State, marked the official end of an era. The university, along with sixteen other public universities in the state, switched from quarters to semesters. To prepare for the change, faculty and staff in the College of Pharmacy put in many hours to overhaul curricula and ensure the same level of education and experience for each student.
Faculty

Our faculty are the bedrock of our consistently high national rankings and world leading research. We are proud of the many accomplishments they have achieved last year.

A. Douglas Kinghorn, PhD, DSc, Jack L. Beal Chair, was awarded an Honorary Doctor of Science degree by the University of Bradford (Bradford, West Yorkshire, UK) in recognition of his considerable contributions in the field of pharmacognosy, through the isolation, characterization and biological evaluation of natural (plant-derived) compounds.

The Ohio State University College of Pharmacy was recently named one of three recipients of the first Innovative Medication Adherence Educators Challenge by the American Association of Colleges of Pharmacy (AACP) and the National Community Pharmacists Association (NCPA). The inaugural award aims to recognize the current efforts of colleges of pharmacy to prepare student pharmacists for improving patient medication adherence in the field.

Thomas Schmittgen, PhD, associate professor and chair of the Division of Pharmaceutics and Pharmaceutical Chemistry, was named the Inventor of the Year by the TechColumbus Innovation Awards.

Bella Mehta, PharmD, associate professor of clinical pharmacy and family medicine and director of the Clinical Partners Program in the College of Pharmacy, was recently named to the 2012 Class of Fellows for the American Pharmacists Association (APhA).

A faculty delegation from The Ohio State University College of Pharmacy traveled to locations in Asia to both create and renew scholarly exchanges between Ohio State and its international counterparts.

Milap Nahata, PharmD, Professor and Chair of Pharmacy Practice Administration at the Ohio State University College of Pharmacy, received the 2013 Sumner J. Yaffe Lifetime Achievement Award of the Pediatric Pharmacy Advocacy Group (PPAG).

Popat N. Patil, PhD, professor emeritus in the College of Pharmacy Division of Pharmacology, has been named a Scholar in Residence at the Medical Heritage Center (MHC) at The Ohio State University.

Assistant Professor Pharmacology (PCOL)

Farewell to our retirees!

Robert Curley  
Professor (MCP)

Jack Fowble  
Director, Senior Systems Manager (CI)

Barbara Hegler  
Program Manager (EOP)
Marlowe explains, “I also wanted to give back to Ohio State in honor of what I received: my profession and my career.”

Philanthropy

He may be best known for his outrageous hats, but alumnus Jerry Marlowe, a 1961 graduate, has long supported the College of Pharmacy and its endeavors in many ways.

A donor to the College of Pharmacy since the ‘70s, he annually supports the education of a pharmacy student through The William McKinley Marlowe and David Reese Marlowe Memorial Scholarship Fund.

Marlowe explains, “I established this scholarship because I wanted to honor my mother and father, Mack and Fanny Marlowe, and my brother, Dave. Both my father and brother were pharmacists, and they and my mother influenced my future pursuits.” The scholarship is aimed at Tuscarawas County high school students who wish to study pharmacy with preference to students who demonstrate financial need. In addition to honoring his family, the pharmacist from Dover, Ohio, is paying it forward.
Ohio State PharmD/PhD program student, Jonathan Vecchiet was named the 2012 George & Betty Richards Fellow. He is pictured above (left to right) with Associate Dean Cynthia Carnes, George and G.K. Richards.

Generation Rx Lab Opens at COSI

College of Pharmacy opened the Generation Rx Drug Education Laboratory located in the Center of Science and Industry (COSI).

The new initiative is a component of Labs in Life, a series of working research laboratories created through a partnership between COSI and The Ohio State University. Visitors to COSI experience hands-on educational experiments such as isolating DNA or measuring the effects of pharmaceutical drugs on heart rate. Participants learn important science concepts while having fun.

“Because drug topics are relevant and interesting, people of all ages are easily ‘hooked’ into learning pharmaceutical science principles. We are thrilled to be able to use this innovative lab space to enhance science outreach for a broad audience within COSI’s walls and beyond,” commented Nicole Cartwright Kwiek, PhD, director of the lab and a faculty member in the College of Pharmacy.

The Generation Rx Lab is sponsored by the Cardinal Health Foundation. It is a further extension of the College of Pharmacy’s Generation Rx initiative, a program intended to enhance public understanding of medication safety issues in general, and those relating to prescription drug abuse in particular.

New Practice Site Helps the Underserved

The Ohio State University College of Pharmacy and the Ohio University Heritage College of Osteopathic Medicine teamed up to create a new ambulatory care rotation for pharmacy students while providing services to Southeast Ohio.

Sarah Adkins, a graduate of the college and a current resident, serves as the preceptor. In the 2011-12 academic year, thirteen Advanced Pharmacy Practice Education (APPE) Doctor of Pharmacy students participated in the program.

The students experienced various ambulatory care settings which serve uninsured and underinsured patients. Included in these experiences is a mobile clinic. Many in the surrounding communities do not have the means to drive to Athens, Ohio, the location of Ohio University’s free clinic, so the clinic comes to them. The clinic is staffed by a pharmacist, a nurse practitioner, and a nurse.
“Because drug topics are relevant and interesting, people of all ages are easily ‘hooked’ into learning pharmaceutical science principles.”
College & Alumni Awards

We are proud of the many wonderful ways that our graduates represent their alma mater. From the community pharmacist in rural America to the industry CEO, they are using the training they received at Ohio State to make the world a better place.

To recognize the accomplishments of our graduates, each year our faculty and alumni recognize those who have distinguished themselves through their contributions to the pharmaceutical sciences. Our 2012 Awardees were recognized at a banquet on May 11, 2012, at Ohio State’s Blackwell Inn.

2012 Josephine Sitterle Failer Alumni Award
Tiffany Kaiser, BS '94, PharmD '03

2012 Jack L. Beal Postbaccalaureate Award
Chang-Ho Ahn, PhD '85
Jay Mirtallo, MS '78
Greg Ordway, BS '80, PhD '85
Ming-Thau Sheu, PhD '86
Edward Stemley, MS '98

2012 College of Pharmacy Distinguished Alumni Award
Barbara Ague, BS '77
Stephen Burson, BS '94
Thomas Comstock, BS '77
Jennifer Seifert, MS '99
Allan Zaenger, MS '84

Each year our students vote on the preceptors who go above and beyond in their duties. The following pharmacists were named the 2012 “Preceptors of the Year”, Jason Makii, Steffany Loper, Stuart Beatty, Lina Saliba, and Jaime Capestany.

Above: Alumnus Chang-Ho Ahn gives his acceptance speech at the Annual Alumni Awards Banquet.

Right: The Preceptors of the Year receive their awards at the White Coat Ceremony held at the Ohio Union.
Research Day

The Ohio State University College of Pharmacy held its Annual Research Day at the 4-H Center on Ohio State’s campus.

Over 65 students, faculty, residents, and research staff showcased their research in a poster session. Two speakers concluded the day with Andrew Dahlem, PhD, speaking on the future of drug innovation and Horace Loh, PhD, discussing pain treatment. Awards were distributed in a variety of categories.

Graduate Students
First Place, Jessica Napolitano
Second Place, Anita Sharma
Third Place, En-Chi Hsu

Undergraduate Students
First Place, Abbey Strazar
Second Place, Abir Mneimneh

PharmD Students and Residents
